
(a) learned circle spectrum
quadratic zero
positive density
learned median
population (quadrature)
largest learned-link eigenvalue
0
1
2
3
0.08
0.12
0.18
training noise σ
(b) learned range recovery at the zero
raw link against the tangent projector
hard-calibrated range error
learned link against the population link
coupling block $\|P^{\perp}\widehat{A}_{\theta}P\|_{\mathrm{op}}$
operator-norm error
10^{0}
10^{-1}
10^{-2}
10^{-3}
0.08
0.12
0.18
training noise σ
